Keypads with CuVerro® Keys

NEMA4/IP65 Rated

Our popular MVP series keypads now have an antimicrobial option. The 1x4, 3x4 and the 4x4 can be manufactured with CuVerro® bactericidal copper keys which continuously kill bacteria*

Available in either x-y matrix or USB

* Laboratory testing shows that, when cleaned regularly, CuVerro surfaces kill greater than 99.9% of the following bacteria within 2 hours of exposure: Methicillin-Resistant Staphylococcus aureus, Staphylococcus aureus, Enterobacter aerogenes, Pseudomonas aeruginosa, E. coli O157:H7 and, Vancomycin-Resistant Enterococcus faecalis (VRE). The use of CuVerro® antimicrobial copper products is a supplement to and not a substitute for standard infection control practices; users must continue to follow all current infection control practices, including those practices related to cleaning and disinfection of environmental surfaces. This surface has been shown to reduce microbial contamination, but it does not necessarily prevent cross contamination. CuVerro® is a registered trademark of GBC Metals, LLC and is used with permission.

The use of CuVerro® antimicrobial copper products is a supplement to and not a substitute for standard infection control practices; users must continue to follow all current infection control practices, including those practices related to cleaning and disinfection of environmental surfaces. This surface has been shown to reduce microbial contamination, but it does not necessarily prevent cross contamination. It should not be interpreted that CuVerro is making claims to solely prevent HAI nor should it be implied that CuVerro products make such claims. CuVerro® is a registered trademark of GBC Metals, LLC and is used with permission (OT-0003-XXXX). See www.CuVerro.com for more details.
